

Hear every word.

Las Cruces Church of Christ recognizes its hard of hearing congregation with the installation of a Listening System.

The sound from the microphone is traveling through a radio wire that has been placed around the perimeter of the room. The sound will be sent wirelessly into your T-Coil/headset.

- If you have a T-coil in your hearing aid, turn on your T-Coil and hear what's being said.
- If you do not have a T-Coil, see a church representative about a loaner Personal Listener. You will be able to adjust the volume to your personal comfort level.

If you would like to learn more about T-Coils or other listening options, contact ATS Resources for a brochure.

If you would like to purchase your own Personal Listener contact ATS Resources. A Personal Listener will work with one-on-one conversations and when in a facility like your church.
